

The screenshot shows an Eclipse IDE console window titled "Console x". The toolbar includes icons for running, debugging, and other IDE functions. The console output for the application "UDPServer [Java Application]" is as follows:

```
UDPServer [Java Application] /snap/eclipse/101/plugins/org.eclipse.justj.openjdk.hotspot.jre.full/bin/linux-x86_64/java
Server started
client connected
Enter the msg to be sent
Hii
```

The screenshot shows an Eclipse IDE console window titled "Console x". The toolbar includes icons for running, debugging, and other IDE functions. The console output for the application "<terminated> UDPClient [Java Application]" is as follows:

```
<terminated> UDPClient [Java Application] /snap/eclipse/101/plugins/org.eclipse.justj.openjdk.hotspot.jre.full/bin/linux-x86_64/java
Enter start to connect to server
start
Message received from server:Hii
```
